

Important reminders about completing Bloodborne Pathogens (BBP) Education

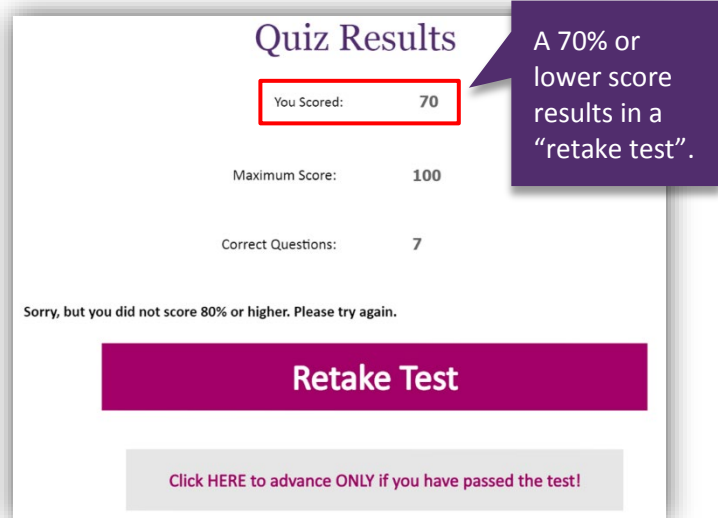

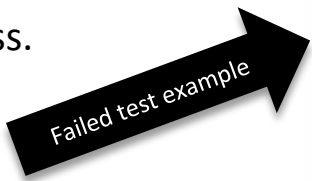

If you have not completed:

Your **active transcript** contains education you have **not yet** completed. If BBP is in your active transcript (**I-Learn** or **Cornerstone Learn mobile app**), you need to launch the course, review the content and then pass the test (80% or higher) linked at the end of the content.

How to grade the test:

The “Quiz Results” page displays your score. If you do not pass, a **“Retake Test”** button is provided each time until you pass.

How to verify completion:

After reviewing the content and passing the test, the course moves to your completed transcript and you are now finished! Use the drop-down options in I-Learn or Cornerstone Learn to view the completed transcript.
