

## Dimensions Acute Lumens Webinars for Proceduralists

### The 4P communication tool

#### Purpose:

*Why are we doing this?*

- Dimensions has a new application, Lumens, for endoscopic specialties. Training, including these webinars help providers take advantage of Lumens efficient workflows.

#### Picture:

*What will it look like when we get there?*

- This 4P is only to communicate the dates, times and links for the live provider webinars. Video CBLs, tip sheets and exercises will also be available. Check the Lumens Provider Playlist in I-Learn for access to all the training and help documents available.
- The optional webinars will give users a chance to see some of the new functionality and ask questions they may have. **IMPORTANT:** The webinars do not take the place of the exercises to practice in PLY, but are meant to supplement it.

Each date and time has a separate link. You can either click on the link or type the address into the browser address bar.

#### Plan:

#### Part:

*What is my role going to be in the plan?*

Leaders should share this information with providers who work in endoscopy. Though optional, providers who will be using Lumens should try to attend a one hour webinar to have a better understanding of important changes. Be aware the list of procedures using Lumens tools is growing. As of 7/18/2019, Lumens procedures are:

Bronchoscopy

Colonoscopy

EGD

ERCP

Lower Endoscopy Ultrasound

Upper Endoscopy Ultrasound

Sigmoidoscopy

Small Bowel enteroscopy

...more to come.
