Register through I-Learn by browsing for: **CEL0090 Developing a Foundation of LEAN Leadership in Healthcare**. After registering, you will receive a confirmation email with further details for the location and course requirements.

Continuing Education Credits

There are a variety of credits available for successfully completing the 3-day session (i.e., CME, Nursing Credit Contact Hours, etc.) Check with the facilitator to verify what credits apply to your specialty.

Objectives

The information shared in this LEAN education will help you to:

- Define and describe fundamental LEAN principles, key concepts, and tools to foster problem-solving and rapid cycle improvement
- Identify through simulation exercises the application of Plan-Do-Study-Act cycles to support rapid cycle improvement in the healthcare setting.
- Relate A3 thinking to effective problem-solving in healthcare to improve processes effecting the quality of patient care.
- Develop standard work and apply an implementation plan to reduce variation in work.
- Describe essential components and tools of leadership standard work to sustain change in a LEAN healthcare environment.
