Tips & Tricks

Oncology History Sidebar: Providers

Easily access robust information about a patient's oncology history from the sidebar in a patient's chart with the improved Oncology History activity. From the sidebar you can now add events as well as edit or add details to automatically created events.
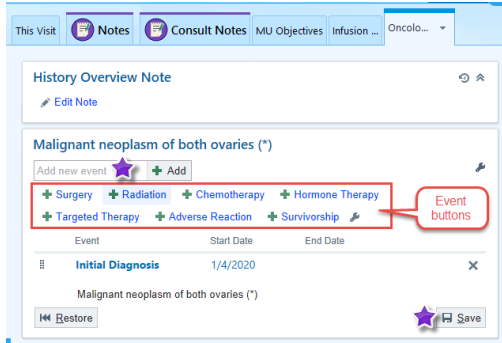

Sidebar Activity

1. Open **Problem List** in a patient's chart.
2. Click on Create Oncology History or Oncology History hyperlink.
   a. Oncology History will open in the sidebar.
3. Click **Show Problem Filters** to choose which problems you want to see events for.
4. The 🔗 icon indicates an event was created automatically.
5. Hover over the Associated Problems icons to see which problems the event is associated with.

   a. 🔵 indicates that an event is associated with a single problem.
   b. 🔵🔵 indicates that an event is associated with multiple problems.
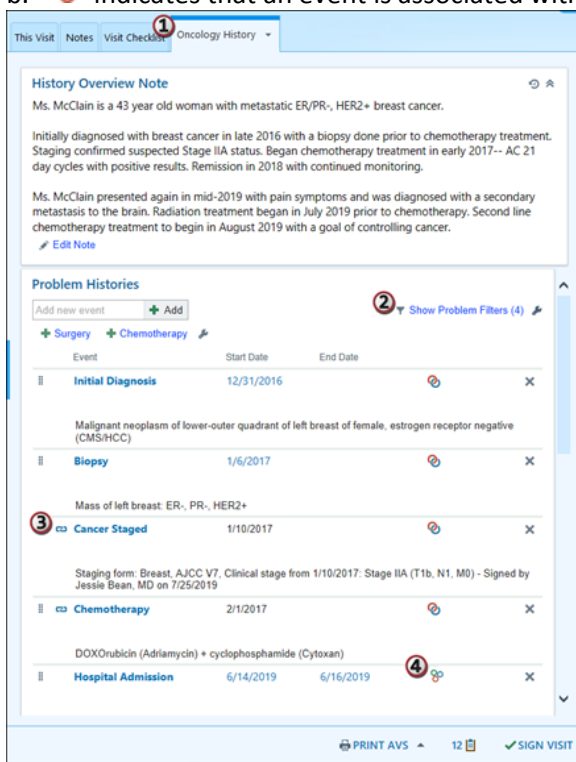

Add a New Event

1. Use the Event buttons or click in the Add new event field to search for a manually entered event.
2. Click **Save** when you are finished

Edit or Add Details to Automatically Generated Events

1. Click a problem that was created automatically, indicated by the 🔗 icon, to edit the details of the event.
   - Note that you can't change the dates of an automatically created event from Oncology History. If you need to change a date, do so from the activity where the date was specified, such as the Treatment Plan Manager activity or Cancer Staging activity.
2. Add notes and information to the **Additional Details** section.
3. Alternatively, click **Edit** to make changes to the **Automatically Generated Details** section.
4. Click **Accept** to save your changes.
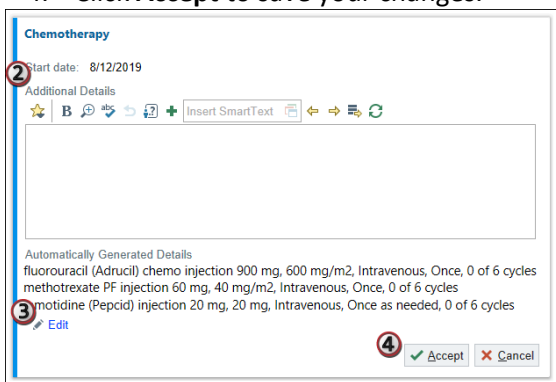

Delete Oncology Problem History

1. Click on the double chevrons in the History Maintenance tile
2. Click **Delete History**
3. In Delete Problem History pop-up window click **Delete**
