d. Two minutes	

**ID: 204684****QUESTION**

Upon leaving the cleanroom, all PPE including shoe covers is removed.

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	<b>X</b>
False	

**ID: 204685****QUESTION**

Hands must not block the first air coming from the HEPA filter of the primary engineering control (i.e., hood).

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	<b>X</b>
False	

**ID: 204686****QUESTION****CATEGORY**

When cleaning and disinfecting a primary engineering control (i.e., hood) all interior surfaces must be treated, including top, grill protecting the HEPA filter, sides, IV bar, and work surface. z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	<b>X</b>
False	

**ID: 204687**

**QUESTION**

**CATEGORY**

Which of the following can be re-worn during a shift if properly stored in the anteroom? z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. Regular gown	<b>X</b>
b. Shoe covers	
c. Chemotherapy gown	

**ID: 204691**

**QUESTION**

**CATEGORY**

The use of sterile 70% isopropyl alcohol to sanitize gloves during compounding activities is not required because gloves used are sterile. z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	
False	<b>X</b>

**ID: 204692**

**QUESTION**

**CATEGORY**

Hoods are cleaned and disinfected: z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. At the beginning of each work shift	
b. Before each batch preparation is started	
c. Every 30 minutes during continuous compounding periods of individual CSPs	
d. When there are spills	
e. When surface contamination is known or suspected	
f. (d) and (e)	
g. All of the above	<b>X</b>

**QUESTION**

**CATEGORY**

Vial stoppers and bag additive ports must be sanitized with a fresh 70% isopropyl sterile alcohol swab before they are punctured? z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	<b>X</b>
False	

**ID: 204701**

**QUESTION**

Which statement is not true?

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

<b>Answer Text</b>	<b>Correct Choice(s)</b>
a. If the stability chart states that something is stable for 7 days in the refrigerator, it is okay to indicate on the label that the product expires in 7 days at room temperature when it is sent to the unit for administration to a patient	<b>X</b>
b. Supplies such as vials and bags are disinfected with sterile 70% alcohol or an approved disinfectant agent before introducing them to the cleanroom	
c. Corrugated cardboard is not allowed in the cleanroom	

**ID: 204705****QUESTION**

Which statement is not true?

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

<b>Answer Text</b>	<b>Correct Choice(s)</b>
a. You must never touch the syringe plunger except on its end	
b. If you inadvertently touch the needle with your hand, you must get a new needle	
c. Alcohol should be allowed to evaporate off the vial and bag additive port before entering it with the needle	
d. When using a multi-dose vial, it is okay to set it outside the compounding area without a cover on the port	<b>X</b>

**ID: 204710****QUESTION**

When working with drugs that are supplied in ampules, which is not true?

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

<b>Answer Text</b>	<b>Correct Choice(s)</b>
a. You do not need to disinfect the ampule with alcohol prior to breaking	<b>X</b>
b. You should always break the ampule away from your face and eyes	
c. The transfer is a 2-step process. Either draw up with a regular needle and switch to 5-micron filter needle to inject into the bag or draw up with filter needle then change to regular needle to inject into the bag.	

**ID: 204714****QUESTION**

There are 5 microbial contamination risk levels for Compounded Sterile Products (CSP) stated in Chapter 797. Which statement is not true?

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

<b>Answer Text</b>	<b>Correct Choice(s)</b>
a. Low-risk with 12 hours or less BUD applies to hoods located out of a cleanroom (or in a segregated compounding area)	
b. Low-risk with 12 hours or less BUD CSP involves not more than three packages/containers and not more than two punctures to the same package/container	
c. A medium risk CSP may receive a maximum end of use date of 12 hours at room temperature and 9 days in the refrigerator	<b>X</b>
d. High risk CSP is made from non-sterile ingredients or sterile ingredients exposed for more than one hour to air quality inferior to ISO class 5 before final sterilization. NH does not prepare high risk level CSPs	

**ID: 204719****QUESTION**

Which is not correct? A cleaning program which is Chapter 797 compliant requires:

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

<b>Answer Text</b>	<b>Correct Choice(s)</b>
a. All cleaning materials, such as wipers, sponges, and mops must be dedicated for use in the cleanroom	
b. Floor mops may be used in both the buffer area and the ante-area but must be in that order	

c. Monthly cleaning is not required if area is maintained clean	<b>X</b>
d. Sterile 70% alcohol is the last step of the cleaning procedure	

**ID: 204724****QUESTION****CATEGORY**

The following should be Standard Operating Procedures of a Chapter 797 compliant IV room. Which is not correct?

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. Access to the buffer area is restricted to qualified personnel with specific responsibilities or assigned tasks in the compounding area.	
b. Make-up or jewelry are not allowed in the cleanroom	
c. Nonessential objects that shed particles, such as pencils, cardboard cartons, and paper towels are okay in the buffer area.	<b>X</b>
d. Essential paper-related products must be placed in a protective plastic sleeve which is disinfected prior to being brought into the buffer area	

**ID: 204729****QUESTION****CATEGORY**

Multiple dose vials can be used up to:

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. 28 days after its initial entry	<b>X</b>
b. 6 hours after its initial entry when open in ISO class 5	
c. 6 hours after its initial entry when open in worse than ISO class 5	

**ID: 204733****QUESTION****CATEGORY**

Which statement is not true?

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. Mandatory cleanroom attire while preparing CSPs is a non-shedding gown, shoe covers, hair cover, mask and sterile gloves	
b. It is acceptable to leave hair hanging from beneath your hair cover	<b>X</b>
c. Sleeves on gowns must cover the entire arm and be tucked into gloves at the wrist	
d. Sterile gloves are mandatory	

**ID: 204738****QUESTION****CATEGORY**

Which statement is not true?

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. Jewelry on your hands and wrists are okay to wear underneath your gloves and gown	<b>X</b>
b. You must wash your hands with soap and water prior to donning gloves when making a CSP	
c. If you touch an item or counter with your gloves while preparing a CSP, you should wipe your hands with sterile 70% alcohol before continuing the preparation	
d. Ceiling and walls of each in the cleanroom is cleaned every month	

**ID: 204743****QUESTION****CATEGORY**

Sporicidal agent is used during the monthly cleaning of the cleanroom.

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
-------------	-------------------

True	<b>X</b>
False	

**ID: 204744****QUESTION**

Personnel are the largest source of particulate contamination in the segregated compounding area?

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	<b>X</b>
False	

**ID: 204745****QUESTION**

Engineering controls in the cleanroom (rooms and hoods) are certified at least every 6 months by an approved certified vendor.

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
True	<b>X</b>
False	

**ID: 204746****QUESTION**

Media fill testing is performed:

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. Performed during initial training	
b. Performed at least annually for team members performing low and medium risk CSP	
c. (a) and (b)	<b>X</b>

**ID: 204750****QUESTION**

Single dose vials can be used up to:

**CATEGORY**

z5018 2020 IV Room Annual Competency Assessment

Answer Text	Correct Choice(s)
a. 28 days after its initial entry	
b. 6 hours after its initial entry when open in ISO class 5	<b>X</b>
c. 6 hours after its initial entry when open in worse than ISO class 5
