

Locate the fire doors in your department.

A fire door is a door that provides passive fire protection reducing the spread of fire and smoke between separate compartments of a structure.

Additional Information: **Remember R-A-C-E**

- **Rescue** – Rescue/remove person(s) from the immediate fire scene/room. Follow your facility's procedure for ensuring patients and staff are safe and accounted for.
- **Alert** – Alert personnel by activating the nearest fire alarm pull station. Then call the emergency response line for your facility to report the exact location of the fire.
- **Contain** – Contain fire and smoke by **closing all doors** in the area. You may need to implement your facility's procedure for medical gas system shutdown if there is a threat of fire in the immediate area.
- **Extinguish** – Extinguish a small fire by using a portable fire extinguisher or evacuate the area if the fire cannot be extinguished safely.
