

Corporate Hubs

Design & Construction Department

May 2022 | Version 2.0

Unprecedented times have called for innovative approaches to ensure Novant Health team members can remain safe, efficient, effective, and flexible while working remotely. Novant Health has taken measures through adjusting our real estate strategy to support remote work and for those who are transitioning to remote work.

A part of the strategy to support remote work, select corporate locations have been transitioned into **Corporate Hubs** where team members can reserve a temporary workspace. This document is intended to be a quick-access resource to review how to reserve a workspace, recall workspace locations, and links to additional resources.
