

EOH identifies team member as acute or non-acute and immediate or future testing

Identify team member status

Instructions for determining “acute” vs. “non-acute” status are provided in the reference document linked here: [Reference document for identifying acute and non-acute team member status.](#)

Immediate or future testing?

Select the linked [EOH Covid-19 Screening Scenarios document](#) to determine next steps around immediate or future testing requirements:

- If **immediate testing** is needed, send the appropriate acute/non-acute Covid-19 testing form:
 - a. **(ACUTE)** [Testing Order Form Covid-19 Acute](#)
 - b. **(NON-ACUTE)** [Testing Order Form Covid-19 Non-Acute](#)
- If **future testing** is needed, send the appropriate email using one of the following templates:
 - a. [Asymptomatic team member testing email template](#)
 - b. [Symptomatic team member testing email template](#)

Note: If future testing is ordered, an email will be automatically forwarded to the future testing inbox and the return-to-work EOH team will process.
